Whats going on currently ?

Virtual Reality-Based Stress Therapy :

This clinical trial aims to evaluate the effectiveness of a virtual reality-based therapy for stress management. We are seeking volunteers to help assess this innovative, non-drug approach to reducing anxiety symptoms.

Lyon, University Hospital (CHU)

Individuals aged 18 to 60, experiencing mild to moderate anxiety, with no history of severe neurological or psychiatric conditions.

Apply

New Immunotherapy for Food Allergies :

This study aims to assess a new targeted immunotherapy for the treatment of food allergies. Participants will help determine its effectiveness and safety, especially for peanut and tree nut allergies.

Paris, Cochin Hospital

Participants aged 12 to 45, diagnosed with peanut or tree nut allergies, with prior evaluation by an allergist.

Apply

Regenerative Medicine for Joint Pain :

This trial investigates regenerative therapies for the treatment of joint pain caused by osteoarthritis. The treatments under study may improve patients' quality of life by promoting natural tissue repair.

Bordeaux, Saint-Augustin Clinic

Adults aged 40 to 70, suffering from moderate osteoarthritis, with no debilitating chronic diseases.
